

Marco Renzelli

Marco earned his Ba. in Physics at Sapienza University with a thesis on space vehicles applications of astrophysical plasma and his Ma. In Theoretical Physics with a thesis on BRST symmetries for quantum cosmology. Then moved to RomaTRE University for a PhD in Industrial Engineering, working on production and characterization of thin PVD films; as a post-doc in the iSTRESS FP7 Project he was in charge in RomaTRE University of XRD stress measurements and PVD films production. He is in LFoundry from 2017 thanks to the PhDTalents grant, working on advanced characterization methods and stress related effects.
