Giulia Avvisati was born on Jan. 14th, 1991, in Latina. She obtained her bachelor (in 2013) and her master degree (in 2015) in Physics at Sapienza, University of Rome. In the same year she won a PhD fellowship and, in November 2015, she started working in the surface physics group of Proff. Maria Grazia Betti and Carlo Mariani. Her research focuses on the magnetic state of molecular spin networks self-assembled on a functionalized graphene support.
