

Tiziana Del Buono, She received Master Degree in Physics at University of L'Aquila in 2004 disserting about Morphological and Structural characterization of nanostructures by Transmission Electron Microscopy. She got a II Level Master in "Process, system and technologies for development and characterization of complex microelectronics devices" at University of L'Aquila (Italy) in 2005 with a thesis about Comparison EDS analysis among SEM, STEM and TEM on semiconductor devices. From March 2005 to September 2005 she worked with INFN (Istituto Nazionale di Fisica della Materia) at University "La Sapienza" of Rome dealing with "Characterization of Nanocrystalline light source by Transmission Electron Microscopy". From 2005 she worked in Micron Technology Italy as TEM Specialist Engineer and then in LFoundry from 2013 as TEM Engineer Leader and now as TEM Staff Engineer Leader. She is co-author of some scientific papers.
