

Yuewen Sheng is currently working as a Postdoctoral Research Associate in the Department of Materials at the University of Oxford. He received his DPhil from Oxford University under the supervision of Prof Jamie H. Warner. His research interests focus on the controlled synthesis of novel two dimensional (2D) materials including graphene, boron nitride and tungsten disulphide, as well as the fabrication of 2D heterostructures for optoelectronic devices, such as photodetectors, light emitting diodes and solar cells.
