

Andrea Adami (MD in Materials Engineering: 2003, PhD in ICT: 2010) is holding a researcher position at FBK on the topic of Sensors and Microsystems since 2003. His research activities have been focused on the development of microfluidics and microsystems in general and in particular on the development of chemical sensors, micromechanical sensors and microfluidics for several applications. He is author of more than 70 papers in International Conferences and Scientific Journals.
