

Dr Nicolas MEDARD is Chief Operating Officer of Nanolane, where he is also responsible of the Commercial and Marketing Department. He is co-founder of Nanolane in which he previously occupied the position of Development Manager and Business Developer.

Nicolas received his Master degree in Polymer Physico-Chemistry from ESPCI-Paris in 1997 and his PhD in Material Surface Physicochemistry from the Maine University in 2000. Then he joined the University of Louvain-La-Neuve, Belgium as Research Assistant in the frame of a European Project aiming at studying additives migration in food products. In 2003, he came back in France to co-found Nanoraptor, the first company exploiting the SEEC technique patents. The company was purchased by Eolane Group in 2006 to become Nanolane. The company released a first range of SEEC equipment for nanoscale characterization in dry in 2008. In 2012, Nanolane awarded the Prix Galien' in the 'Innovative Company' category. Few month ago, Nanolane released a new generation of live and label-free equipment for sample characterization at nanoscale.
