

Mariglen Angjellari (MA), obtained his PhD in Chemical Science at University of Rome 'Tor Vergata', actually is post-doc researcher at the same university and scientific consultant at Nanoshare srl. MA has obtained Master of Science in 'Chemistry and Advanced Chemical Methodologies' cum laude at University of Camerino, Italy in 2011. After that, he has been awarded a Swiss Government Excellence Scholarship (ESKAS) to conduct research at University of Berne in Switzerland for an academic year. His research interests are: carbon materials for energy and hydrogen storage; gas sensing materials; thermal management; synthesis of novel polymer materials for industrial 3D (4D) printing applications. MA is co-author of more than 10 publications in international journals, co-author of a book chapter regarding nanotechnology applications in food and co-inventor of a patent.
