

Franca Albertini is the leader of the Magnetic Materials Group at the Institute of Materials for Electronics and Magnetism (IMEM) of the Italian National Research Council (CNR).

Her research interests are focused on nanostructured and bulk magnetic materials for applications in energy efficient technologies, magnetic memories and sensors, and nanomedicine.

She is author of 130 publications and more than 200 presentations (30 invited talks) at scientific conferences. She is Member of the General Council of the European Magnetism Association (EMA) and Elected Member of the Administrative Committee of IEEE Magnetics Society. She is in the Editorial Board of Journal of Physics D.
