

Dr. Alberto Rainer holds a MS degree in Materials Engineering and a PhD in Materials for Energy and the Environment. He holds a tenured Assistant Professor position at the Dept. of Engineering, Università Campus Bio-Medico di Roma (UCBM). He is also associate researcher at the National Research Council, Institute for Photonics and Nanotechnology (IFN) of Rome. He was among the co-founders of the UCBM-IFN Joint Lab for Nanotechnologies for the Life Sciences.

His research focuses on tissue engineering, with emphasis on nanostructured biomaterials, bioprinting, and microfluidics-based in vitro models.
