

Dr. Fabrizio Mattei graduated from University “La Sapienza” (Rome, Italy) and completed his specialization in biotechnologies and oncology at the same university. In 2000, he became a fellow at the Edward Jenner Institute for Vaccine Research in David Tough's laboratory (Newbury, U.K.), where he acquired experience in the field of dendritic cell immunology. He is currently a researcher and group leader at the Istituto Superiore di Sanità (Rome, Italy), where he acts as scientific coordinator of a project granted by the Italian Ministry of Health, focused on the multifaceted applications of microfluidic chips in cancer, in collaboration with Dr. Luca Businaro (Institute for Photonics and Nanotechnologies, CNR, Rome, Italy).

Dr. Mattei is member of the Editorial Board of various distinguished international scientific journals, including Scientific Reports, Frontiers in Immunology and Oncoimmunology. In parallel, Dr. Mattei conducts extensive reviewer activity for various PubMed-indexed journals, such as Nanoscale, Journal of Pathology, The Journal of Immunology, Molecular Cancer Research and Cancer Letters. Dr. Mattei also acts as project evaluator for some European and international funding agencies.
