

Francesca Baldelli Bombelli is Associate Professor in Chemistry at the Politecnico di Milano. She has been Group Leader at the European Centre of Nanomedicine (CEN, <http://nanomedicen.eu>) in 2013-2015. In 2011-2014 she has been Lecturer in Nanotechnology and Colloid Science at the School of Pharmacy, UEA, Norwich, UK. She has been Post-Doc researcher: 2009-2011 at CBNI, University College of Dublin, Dublin, Ireland; 2006-2009 at the University of Florence; 2004-2006 at Chalmers University, Gothenburg, Sweden. She got her PhD in Chemical Sciences in 2004 at the University of Florence. She is a member of the SupraBioNano Lab at the Department of Chemistry and her main research interests are in the development of engineered nanomaterials (ENM) as imaging and therapeutic tools. She is also interested in studying the complex processes occurring at the nano-bio interface between nanomaterials and biological matter.
