

Andrea M. Giovannozzi is a researcher in the Food Metrology Program at the National Institute of Metrological Research (INRIM) in Turin, Italy, with a master degree in Industrial Biotechnology and a PhD in Biochemistry. He also worked as a guest researcher at the National Institute of Standards and Technology in Gaithersburg, USA. He supported the setting up of the biometrology and optical spectroscopy laboratories at INRIM. He has been working for several years on the development of analytical methods based on vibrational spectroscopy techniques (Fourier transform infrared, Raman, and surface-enhanced Raman scattering) and nanotechnology for the detection of diagnostic biomarkers and food contaminants within the European Metrology Research Programme and in collaboration with several industrial partners.
