

Ferdinando Iucolano graduated in Physics with full marks at the University of Catania in 2004. In 2008 he received the Ph.D. degree in Physics on Nanoscale approach to charge transport phenomena in GaN-based structures. From 2011 he joined as power device designer for the development of GaN technology in the R&D department of STMicroelectronics. In 2014 became responsible for device physics and design group for wide band gap materials. Since 2017 he is in charge of design and product development for GaN-based power devices including RF-power, Power Switches devices and GaN ICs. He published more than 70 papers on international journals and patents.
