

Gian Carlo Gazzadi is senior technologist at the Nanoscience Institute of CNR, Modena-S3, where he is coordinator of the Nanofabrication Lab. His main research interests are the nanofabrication with focused ion beam (FIB) and focused electron beam induced deposition (FEBID), and part of his activity is also devoted to analysis and nanofabrication for industry. He is author of 100 scientific publications and member of the steering committee of the International Focused Electron Beam Induced Processing (FEBIP) Workshop. In 2018, he has been chairman and organizer of the 7<sup>th</sup> FEBIP Workshop in Modena.
