

Sara Politi

Sara Politi received the MSc degree in Chemistry from the University of Rome Tor Vergata in 2016.

In 2016 SP won a grant for a PhD position in Chemical Sciences at the University of Rome Tor Vergata. Her research activity is focused on the design, synthesis and characterization of innovative hybrid materials based on nanocarbons, metal nanostructures and polymer systems. She is also involved in modeling of nucleation and growth processes related to electrodeposition reactions.
