CURRICULUM VITAE

Leonardo Orazi is currently Associate Professor in Manufacturing Engineering at the University of Modena and Reggio Emilia. He graduated in Mechanical Engineering at the University of Bologna in 1993. In 1998 He obtained the PhD degree in Mechanics of the Materials at the University of Pisa. In the following three years of post-doctoral positions at the University of Bologna he worked in the field of fracture mechanics and fatigue thresholds of metal alloys. In 2001 he became Research Associate in Manufacturing Engineering at the University of Modena and Reggio Emilia. Since 2004 his main field of research is laser based manufacturing, mainly ablation, surface laser treatments and laser micro manufacturing. In the last three years, he focused his attention in the use of ultrafast lasers for the surface nano texturing and the generation of Laser- Induced Periodic Surface Structures (LIPSS) for industrial applications.

MAIN RESEARCH PROJECT

PRIN 2006 - Mathematica Simulation of Laser Hardening process and Experimental validation - SIMEX
Role: participant
Duration: 12 months

H2020-ICT-30-2017 - Micro QD-LED Direct micro patterning - MILEDI
Role: Local Unit Coordinator
Duration: 42 months
Budget: 378125 €

Progetto: H2020-MSCARISE-2016 - Development of novel dental implants with advanced mechanical properties and improved nanostructured surface - NANOSURF
Role: Local Unit Coordinator
Duration: 48 months
Budget: 144000 €
