

Matteo Ferroni received his PhD degree in Physics at the University of Ferrara in 1998, and after a post-doctoral fellowship in Belgium, he served at the microscopy facilities of the Universities of Ferrara and Venice. Presently Matteo Ferroni is Professor at the Department of Information Engineering of the University of Brescia and Research Associate of the Institute for Microelectronics and Microsystems (IMM) of the National Research Council (CNR).

His main research activity concerns the characterization of semiconducting nanostructures by means of transmission and scanning electron microscopy and the development of nanoscale tomography in the scanning electron microscope.
