

Giovanna Calabrese has a PhD in Medical Embryology, Pathology and Experimental Hematology and currently is a post-doc at the University of Catania, Dept. of Biomedical and Biotechnological Sciences. Her main research topics are regenerative medicine and tissue engineering applied to both neural and osteo/chondral regeneration. Specifically, she is studying the repairing capabilities of the combination between mesenchymal stem cells and 3D biomimetic materials, both in vitro and in animal models. She has published more than 20 papers in reputed journals.
