

Salvatore Pernagallo received his MSc in molecular biology in 2004, his specialization in molecular and medical genetics in 2011 both at the University of Catania (Italy), and his PhD in 2010 at the University of Edinburgh (UK). He then worked as a post-doctoral researcher at the University of Edinburgh on the developing of substitutive technology for stem cell culture. From April 2011 he is employed by DestiNA Group. Currently, he is the operations director with the responsibility of identifying new product and application opportunities for the company, and ensuring the DestiNA technology development and management of collaborative projects.
